

## RECOMMENDED GEAR

RECOMMENDATIONS: Over the years we have had hunters hinder or ruin their hunt by not being prepared for our hunts, so we are offering a few recommendations to help increase your odds of success.

1. We highly recommend 40 mm objective binoculars or higher, with no less than 10 power.
2. For elk we recommend .30 caliber or better firearms. For Mule Deer, Whitetail and Antelope we recommend .243 calibers or better. A tripod attached to your firearm or shooting sticks is also a good idea for long range shooting.
3. Good quality rain gear.
4. Good boots for possible long walks in canyons and for the cold.
5. Several change of clothing, warm underwear, gloves and jackets. During the late season hunts we recommend layering your clothing.
6. Rifle should be sighted in at 200 yards. And you should know exactly where it is shooting at 100 and 300 yards.
8. Hand Warmers for the late hunts.
9. Small backpack containing such things as calls, matches, flashlight, rope, chap stick and small first aid kit.
10. Video Camera or camera, and film.

These are just samples of the recommended gear. Ute Creek Outfitters will have all the necessary tools, equipment and resources to make your hunting adventure a pleasurable one. Remember, your safety comes first. If you need to make special arrangements to prepare for your hunt, let us know a head of time so we can make the necessary changes. If you have any special dietary needs, please let us know a head of time so that we can prepare and accommodate.

Thank You
